

Molecular Pathology Approach to Cancer

De Rode Hoed
AMSTERDAM
Netherlands

Registration deadline
04 April 2016

Invited Speakers

Judith Bovee (Netherlands)

David Huntsman (Canada)

A. John Iafrate (USA)

Andreas Jung (Germany)

Richard Marais* (UK)

Serena Nik-Zainal (UK)

Jorge Reis-Filho* (USA)

** Scientific Organising Committee*

Brian Rubin (USA)

Giorgio Stanta* (Italy)

Matt van de Rijn (USA)

Marc van de Vijver* (Netherlands)

Britta Weigelt (USA)

Pieter Wesseling (Netherlands)

EACR-OECI Keynote Award

Lecturer:

Cédric Blanpain (Belgium)

Topics

- The role of pathologists in precision medicine
- Massively parallel sequencing
- Perspectives of molecular testing for clinical decision-making in Europe and North America
- Causes of possible pitfalls in molecular analysis
- Molecular pathology of breast cancers and the incorporation of novel molecular tests into clinical practice
- Novel findings in ovarian and endometrial cancers
- Targeted therapy in melanoma
- KIT and novel targets in gastrointestinal stromal tumours
- Genetic testing in colorectal and lung cancers
- Translocations in sarcomas and central nervous system tumours

Networking evening - 09 May 2016

This will be an informal social evening of light food and networking to enable participants to make lots of new connections in a short space of time
