

Gynaecological Pathology Working Group

European Society of Pathology

The Gynaecological Pathology Working Group is chaired by Maria Rosaria Raspollini, MD, PhD, Florence, Italy.

Mission

1. To develop scientific cooperation among pathologists who are interested in Gynaecopathology
2. To promote Gynaecopathology, raising the professional profile of the discipline
3. To build strong bridges between pathologists, gynaecologists, and all those interested in gynaecological pathology
4. To cooperate with other ESP Working Groups
5. To collaborate with other Societies with interest in Gynaecopathology and Gynaecology Oncology

Objectives

1. To organise training and teaching programs, sessions at ESP Congresses and in the affiliated Society congresses
2. To propose guidelines, to build consensus and to promote new tools for improving the diagnosis of gynaecological pathology
3. To foster the interaction among members
4. To cooperate with other Societies and Study Groups

In the last years the Working Group has finalized the following:

1. Organization of Specific Sessions at each ESP congress.

2. Organization of joint sessions, particularly with Uro pathology and Pediatric Pathology WGs, in the last ESP Congresses
3. Engineering a MoU between ESP and ESGO (European Society of Gynaecological Oncology) aiming to organize joint scientific sessions at respective congresses and courses, and participating to respective WG or consensus conferences
4. Production of Recommendations related to “Reporting of malignant ovarian surface epithelial/stromal tumours”
5. Participation to the projects “Cervical cancer clinical management guidelines” and “Quality indicators in the management of endometrial carcinoma” promoted by ESGO and aimed to produce European Guidelines, recommendations, and quality assurance.
6. Collection of interesting neuroendocrine tumors of the gynaecological tract among the WG members
7. Organization of training Courses: a) Germ cell tumours: the ovary & the testis – December 2014, Florence. b) Update in Genito-urinary tract tumors for personalized therapy: Focus on new emerging topics in bladder, ovary, and testis – May 2017, Florence.

Sincerely,

Chair:
