This educational content was co-developed and funded by AstraZeneca and MSD.

The authors, reviewers, and editors of these educational materials have made extensive efforts to ensure that treatments, diagnostics and discussions about medical practice are accurate and conform to the standards accepted at the time of publication. However, constant changes in information resulting from continuing research and clinical experience, reasonable differences in opinions among authorities, unique aspects of individual clinical situations, and the possibility of human error in preparing a series of educational materials mean that other sources of medical information may differ from the information on this site.

Content in the educational materials reflects medical practice and information in Europe. Outside of Europe, clinical guidelines, practice standards, and professional opinion may differ and the reader is advised to also consult local medical sources.
