

GYNAECOLOGICAL PATHOLOGY WORKING GROUP

European Society of Pathology

Newsletter August 2010

Dear Members of the Gynecologic Pathology Working Group, dear friends and colleagues. We hope you have had a restful summer.

The Intercongress Meeting of the European Society of Pathology will take place next week (31st August, 3rd September 2010) in Krakow.

1. Activities of the GYNAECOLOGICAL PATHOLOGY WORKING GROUP in the Intercongress

The GYN WG has organized a slide seminar and short course focused on pathology of the endometrium.

We are pleased to have as well a joint session on Cytology/Pathology of the uterine cervix, which has been organized in conjunction with the working group of cytopathology. The organization of this session has been an stimulating experience. We hope you will find the result attractive and scientifically interesting.

As you will see, a good number of relevant gynaecopathologists from many different European countries, a few of them working in the USA, have accepted to share their expertise with us in that meeting. We would like to thank all the colleagues that have accepted to participate as speakers in the different activities.

In order to help you to organize your time during the meeting you will find the next two pages all the GYN activities organized by the WG.

Slide seminar: Difficult cases in Gynecological pathology

September 2nd from 8.00 to 11.00 (2.30 hours)
